## Summary :-

1. There are 1470 employees in the company.
2. Most employees who left the company were dissatisfied(73) with their jobs , while some who were satisfied(46) also left.
3. Some employees left the company because they couldn't commute to their jobs, but those who lived nearby made up 61% of all attrition.
4. 182 people with 0 to 10 years of employment left the organization, which is the highest number of departures. Only 5 employees with 31 years or more of employment departed the company.
5. According to job level attrition, 143 employees at Level 1 make up the majority of the attrition workforce.
6. The lowest attrition rate is in HR, while the highest is in R&D.
7. With 150 male employees, male attrition is higher than that of female employees.
8. Attrition rates differ depending on the job type; for example, sales executives experience the highest attrition rates (62), while research directors experience the lowest rates.
